

ARE THERE **HEROES** IN YOUR HOME?

SMOKE AND CARBON MONOXIDE ALARMS SAVE LIVES.

- Install smoke alarms on every storey of your home and outside all sleeping areas.
- Install carbon monoxide alarms outside all sleeping areas if your home has a fuel-burning appliance, fireplace or attached garage.
- Test smoke and carbon monoxide alarms every month.

Smoke and Carbon Monoxide Alarms Save Lives. One in three fire deaths happen in homes with no working smoke alarms. And over 80% of all carbon monoxide deaths and injuries occur in the home. Protect the ones you love.

Install smoke alarms on every storey and outside all sleeping areas of your home. For added protection, install a smoke alarm in every bedroom.

Install carbon monoxide alarms outside all sleeping areas if your home has a fuel-burning appliance, fireplace or attached garage. For added protection, install a carbon monoxide alarm on every storey of your home.

Test smoke and carbon monoxide alarms monthly by pressing the test button. If the alarm doesn't sound, install a new battery. If the alarm still doesn't sound, replace the alarm with a new one.

Replace alarm batteries at least once a year and whenever the low-battery warning chirps.

Smoke and carbon monoxide alarms wear out over time. Replace alarms according to manufacturer's recommendations.

Practice a home escape plan so everyone in your home knows exactly what to do if the smoke or carbon monoxide alarms sound in an emergency.
